RESOLUTION

2ND AVENUE OVERPASS

WHEREAS, pursuant to Board Rule 415, on November 3, 2016, The Board of Trustees of The University of Alabama (“Board”) approved an amendment to The University of Alabama’s (“University”) Campus Master Plan to include the 2nd Avenue Overpass project (“Project”); and

WHEREAS on November 3, 2016, in accordance with Board Rule 415, the Board approved a Stage I submittal for the Project; and

WHEREAS, in order to preserve the substantial knowledge base which has been gained during the course of development for the Project and communications with the Railroads, and to ensure an efficient transition from planning phase to the design phase, on February 3, 2017, the Board approved a waiver of the Consultant Selection process and authorized the University to proceed with engineering services utilizing McGiffert and Associates, LLC, of Tuscaloosa, Alabama; and

WHEREAS, the University negotiated a fee of 5.8% of the cost of construction, security, the non-Alabama Power share of the power line burial, landscaping, and bus shelter, plus $210,038 for reimbursable expenses; and

WHEREAS, on June 16, 2017, the Board approved a Revised Scope to enhance the use and functionality of the Spiller site and provide additional parking under the South end of the overpass by lengthening the overpass to the south in lieu of a Mechanically Stabilized Earth (MSE) wall, and to enhance safety by adding a barrier rail between the sidewalk and travel way, and barrier rail impact attenuators (crash cushion at end of wall); and

WHEREAS, on June 16, 2017, the Board approved a Revised Budget from $13,824,663 to $14,741,960 to reflect the negotiated engineering fee and the cost of the Revised Scope; and
WHEREAS, on June 16, 2017, the Board approved the renderings for the Project; and

WHEREAS, on November 9, 2018, the Board approved Revised Funding and a Revised Scope and Budget to include provisions of the Infrastructure for Rebuilding America (INFRA) grant; and

WHEREAS, on November 9, 2018, the Board authorized the University to complete any agreements that are necessary for acceptance of INFRA grant funds; and

WHEREAS, on December 11, 2018, pursuant to Title 39, State Bid Law of Alabama Code, competitive bids were received for the Medium Voltage Underground (MV UG) Conversion package for the Project and Taylor Electrical Contractors, of Cottondale, Alabama (Taylor Electric), was declared the lowest responsive and responsible bidder with a base bid in the amount of $1,385,000; and

WHEREAS, the University is requesting approval to award the construction contract for the MV UG Conversion package for the Project to Taylor Electric for a total contract amount of $1,385,000; and

WHEREAS, the Project location and program have been reviewed and are consistent with University Design Standards, and the principles contained therein; and

WHEREAS, the Project will be funded from Plant Funds in the amount of $13,905,473 and the pending INFRA grant funds in the amount of $6,025,657; and

WHEREAS, the budget for this Project remains as stipulated below:

<table>
<thead>

Expenses (Geotech, Construction Materials Testing, Inspections, Surveys, Transportation, Field Office) $605,637
Other Project Costs (Testing, Advertising, Postage) $25,000

**Total Project Cost $19,931,130

**Construction – MV UG is based on construction contract bid from Taylor Electric in the amount of $1,385,000 plus the cost of owner provided material in the amount of $163,700.

**Contingency is based on 5% of the total costs of construction, demolition, security, $800,000 of the power line burial not yet completed, landscaping and bus shelter.

**Architect/Engineer fee is based on 5.6% of the total costs of construction, security, the non-Alabama Power share of the power line burial in the amount of $998,000, landscaping and bus shelter, plus $452,732 for reimbursable expenses.

****UA Project Management fee is based on 3% of the total costs of construction, demolition, security, power line burial, landscaping, bus shelter and contingency.

NOW, THEREFORE, BE IT RESOLVED by The Board of Trustees of The University of Alabama that Stuart R. Bell, President, Matthew M. Fajack, Vice President for Finance and Operations and Treasurer, or those officers named in the most recent Board Resolutions granting signature authority for the University of Alabama be, and each hereby is, authorized to act for and on behalf of the Board of Trustees of the University of Alabama in executing the aforementioned contract with Taylor Electrical Contractors, of Cottondale, Alabama, for the MV UG Conversion package for the Project in accordance with Board Rule 415.
December 17, 2018

To: Stuart R. Bell

From: Matthew M. Fajack

Subject: Board Item – Action Stage IV submittal: 2nd Avenue Overpass

On December 11, 2018, pursuant to Title 39, State Bid Law of Alabama Code, The University of Alabama (“University”) received competitive bids for the Medium Voltage Underground (MV UG) Conversion package for the 2nd Avenue Overpass project (“Project”). Taylor Electrical Contractors, of Cottondale, Alabama (Taylor Electric), was declared the lowest responsive and responsible bidder with a base bid in the amount of $1,385,000, which is within funds available for the Project. The University is requesting approval to accept Taylor Electric’s base bid for a total contract amount of $1,385,000.

The Project is funded from Plant Funds in the amount of $13,905,473 and the pending Infrastructure for Rebuilding America (INFRA) grant in the amount of $6,025,657.

This Project location and program have been reviewed and are consistent with the Campus Master Plan, University Design Standards, and principles contained therein.

I have attached a Certified Bid Tabulation, Resolution, Executive Summary, Project Summary, Project Planning Report, and Location map for your review. Subject to your approval, I recommend this item be forwarded to the Chancellor for inclusion as an Action Item on the agenda of the Physical Properties Committee at the Board of Trustees meeting scheduled for February 7 – 8, 2019.

EXECUTIVE SUMMARY
PROPOSED CAPITAL PROJECT
BOARD OF TRUSTEES SUBMITTAL

Meeting Date: February 7 – 8, 2019

CAMPUS: The University of Alabama, Tuscaloosa, Alabama

PROJECT NAME: 2nd Avenue Overpass

PROJECT LOCATION: Extension of 2nd Avenue Corridor from Lancaster Road at 15th Street to Bryant Drive, between Sewell-Thomas Stadium and School of Law

ARCHITECT: McGiffert and Associates, LLC, Tuscaloosa, Alabama

THIS SUBMITTAL:

☑ Campus Master Plan amendment
☑ Stage I
☑ Stage II, Consultant Selection Process waiver
☑ Budget Reallocation
☑ Stage III
☑ Revised Scope and Budget
☑ Revised Funding and Scope and Budget
☒ Stage IV (Construction – MV UG Conversion)

O&M Costs: Annual lighting, road repairs and bridge maintenance $29,210

NEW EQUIPMENT REQUIRED:
New equipment includes street lights along each side of 2nd Avenue from Bryant Drive to approximately 600 feet north of 15th Street (south end of University property and north end of Lancaster Road); a decorative traffic signal at the intersection of 2nd Avenue and the drive along the north side of Coleman Coliseum; sidewalks; and landscaping.

RELATIONSHIP & ENHANCEMENT OF CAMPUS PROGRAMS:
The 2nd Avenue Overpass project ("Project") is a critical link to the area south of campus for general University of Alabama ("University") emergency responder and event access. Currently there are only two above grade/flyover crossings for campus access (15th Street to Queen City and McFarland Boulevard) and they are approximately 2-1/4 miles apart and are at the farthest edges of campus. The other four current access points to the south, that link with major City of Tuscaloosa arterial roads, are all at-grade crossings. These crossings are not only closed numerous times during the day for normal train operations, but are also often closed for railroad maintenance and train siding operations for extended, unplanned periods. This is extremely disruptive for individuals attempting to access campus; and in the case of a major railroad incident, could greatly impact the ability to evacuate or access campus.

This Project will ensure the ability to consistently access campus and will also increase the ability of the campus to manage traffic volume by adding a 5th access point to the south. In particular, this will greatly enhance event traffic flow from the Coleman Coliseum lot and the new Capstone Parking Deck, as patrons will no longer have to access Bryant Drive. This Project will also support the core master plan principle of keeping traffic and parking to the perimeter of campus so as to minimize pedestrian/vehicular conflicts. This should substantially reduce the amount of crossover traffic at Bryant Drive and Hackberry Lane and Bryant Drive and 2nd Avenue which will enhance pedestrian flow at those intersections.

The University has received notice that it will be awarded an Infrastructure for Rebuilding America (INFRA) grant for the Project. The grant provides federal assistance to highway and freight projects of national or regional significance.

The INFRA grant will allow for the inclusion of a connector road to the intersection of 2nd Avenue and 15th Street (AL HWY 215), enhancements to the intersection including University standard traffic signals, additional turn lanes on 15th Street in both East and West directions providing access to 2nd Ave, and the partial demolition of University properties located on 14th Street.

Finally, this Project will enhance safety by offsetting the amount of traffic across the above grade crossing which is a concern.
Project Summary

2nd Avenue Overpass

The 2nd Avenue Overpass project ("Project") will be constructed over the Kansas City Southern and Norfolk Southern railroads ("Railroads") that border the south of The University of Alabama ("University") campus providing an extension of 2nd Avenue from Lancaster Road at 15th Street to Bryant Drive between Sewell-Thomas Stadium and the School of Law.

The Project is essential to decrease traffic delays and to improve safety conditions and environmental conditions near the University campus. This will be accomplished by providing an alternative route to the approximately 70,000 vehicles per day that currently cross the at-grade railroad crossings along the southern edge of campus.

This Project will consist of converting a portion of the eastern most section of the Coleman Coliseum parking lot into a three-lane road and constructing a three-lane road from the southern end of the overpass to the northern end of Lancaster Road. The roads will include sidewalks, bike lanes and lighting. The overpass cross section will consist of a 10’ bike/pedestrian way, a 4’ zone including a protective barrier/separation wall, two (2) 12’ travel lanes separated by a 12’ turn lane and another 3’ clear zone shoulder at the guardrail. The intersection of the east-west road between Coleman Coliseum and Sewell-Thomas Stadium will include a traffic signal. The 15th Street intersection will be re-worked.

The Project will be designed to provide parking to the greatest extent possible under the overpass structure in order to minimize the loss of parking. The Project will also require the relocation of Alabama Power and University distribution lines underground and the 115MKV and 46MKV transmission lines that run parallel to the tracks to be raised.

The south approach to the overpass will be lengthened to 15th Street to enhance the use and functionality of the Spiller site and provide additional parking in the area. Additionally, to enhance safety, a barrier rail between the sidewalk and travel way and barrier rail impact attenuators (crash cushions at end of wall) will be included.

This Project will include all necessary support infrastructures including stormwater, security, and safety equipment, lighting, wayfinding, transit shelter and landscaping.
The Nationally Significant Freight and Highway Projects (NSFHP) programs provides Federal financial assistance to highway and freight projects of national or regional significance. The Department is referring to this program as the Infrastructure for Rebuilding America (“INFRA”) program. The University has been awarded, conditioned on receipt of an executed grant agreement, an INFRA grant for this Project that will allow for a connector road to the intersection of 2nd Avenue and 15th Street (AL HWY 215), enhancements to the 15th Street intersection including University standard traffic signals, additional turn lanes on 15th Street in both East and West directions providing access to 2nd Ave, the inclusion of decorative barrier rail/fence on the bridge and approaches to the bridge, and the partial demolition of University properties, specifically Monkey Joes and Hotel and Restaurant Supply, located on 14th Street.

Additionally, the bridge will be designed and constructed in order to accommodate a possible future pedestrian bridge. The pedestrian bridge would then allow the overpass to move from three lanes of traffic to four. The future projected traffic volume would dictate removing the pedestrian walk area on the bridge and converting it to a traffic lane, which would then necessitate a dedicated pedestrian bridge.
