CAPITAL RENEWAL PLAN

To avert future decline, a major renovation of Honors Hall is recommended within 3-5 years. A planned renovation and addition budget of \$34M has been established in Tab 2 of the June 2023 ACDP. With projected 10-Year capital renewal liabilities for existing HVAC Systems, Elevators, Lab Equipment, and Interior Finishes, as well as code compliance opportunities for Life Safety, Accessibility, and Energy place the liabilities at over \$13M. A major renovation project signifies our commitment to campus stewardship while embracing innovation and program needs, assuring a vibrant and efficient future for Honors Hall.

HONORS HALL

Photo courtesy of UA Campus Development, Honors Hall 2023

In 1922, the original constructed design of Honors Hall, formerly known as Nott Hall, was completed by Miller, Martain, and Lewis out of Birmingham, AL. The building architecture was a Colonial type with a classical portico of four Roman Ionic stone columns. It was constructed at 185 feet in length, 55 feet in width and three stories in height. The original construction allowed for future expansion rearward and towards the east from each end of the building. At its completion, it adequately occupied the medical school and was considered a forerunner with modern equipment and space for its two-year medical program.

The top floor contained a large dissecting room on one end and a similar room for microscopic anatomy across the opposite end. Twenty-six new McClintic dissecting tables were installed to provide space for two students per cadaver. To both sides of the connecting corridor were research rooms, preparation rooms, radiographic and fluoroscopic department, photographic and micro-photographic rooms, an amphitheater, lecture hall, museum, departmental library, etc. The medical library required a full-time librarian to maintain over 6,000 volumes as well as its subscription to approximately one hundred and twenty medical journals.

The first floor housed the department of physiology and pharmacology and the department of physiological chemistry. This floor also housed the Dean's office and medical library. The ground floor consisted of the department of pathology, bacteriology and hygiene, an Auditorium for general assemblies, a machine shop in charge of a full-time mechanic, and the office of the University physician, where the student health clinic was maintained.

In 2020, during a specially called meeting of the Board of Trustees, there was a unanimous vote to rename the building Honors Hall. As of today, the building is the home for the University Honors program, Animal Care Facility, Biological Sciences, and Academic Affairs research space.

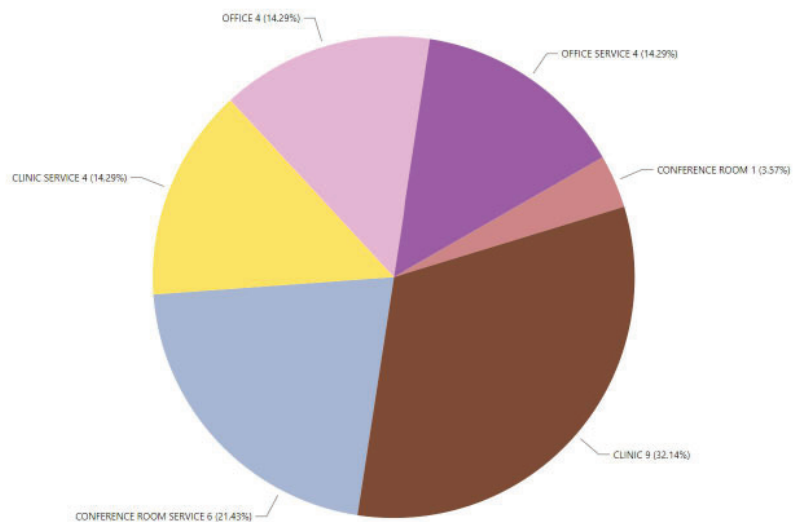

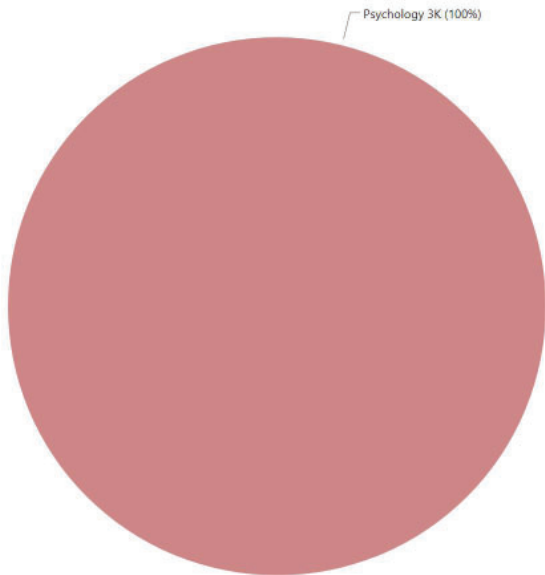

Today Honors Hall houses Honors College and Biological Sciences.

Originally known as “Nurses’ Home”, the building was constructed in 1923 through gift of J.T. Horne, this building occupied by Druid City Hospital School of Nursing from 1923 through 1947. Used by University of Alabama from 1951 to 1954 to house first state supported collegiate school of nursing in Alabama.

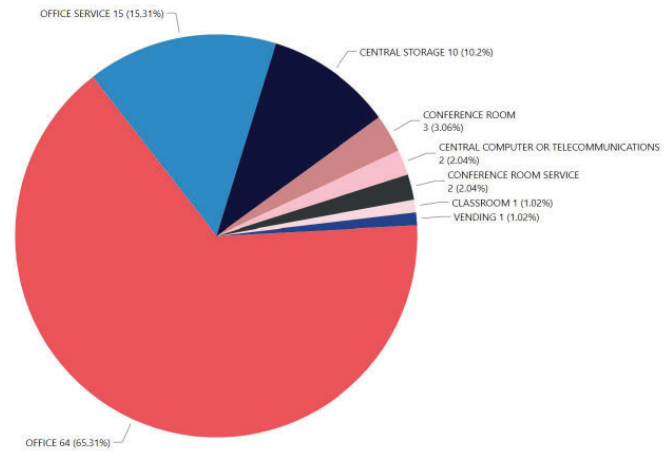

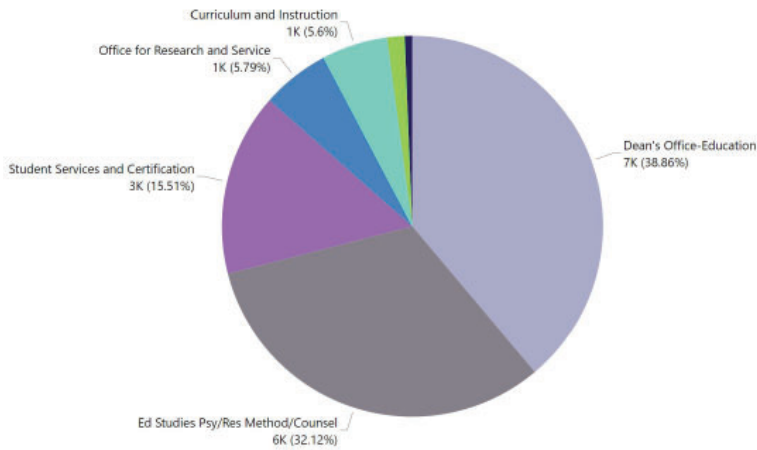

The original building was designed in Colonial Revival style architecture and utilized by off-duty nursing staff. The first floor contained living rooms, reception room, kitchenette, and breakfast room. The second floor contained bedrooms and a large sleeping porch.

This building served as the library until 1940, when it became the administration building (1941-1969). In 1971 the building was named in honor of Oliver Cromwell Carmichael (1891-1966), President of the University of Alabama (1953-1957).

A graduate of the University and a Rhodes Scholar, Carmichael also served as Chancellor of Vanderbilt University (1937-1946) and Chairman of the Board of Trustees, New York State University System (1943-1953).

Carmichael was the first Amelia Gayle Gorgas Library and was intended to serve as a temporary library until a larger one could be secured and moved out. After the library was moved out in 1940, it became an administration building until Rose Administration was completed in 1969.

Carmichael was built to be similar in scale to the building formally known as Nott Hall directly across the Quadrangle from it.

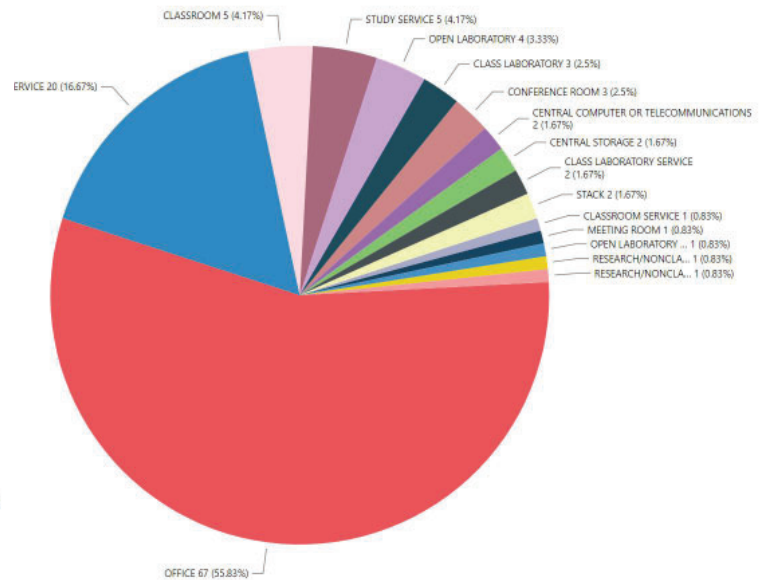

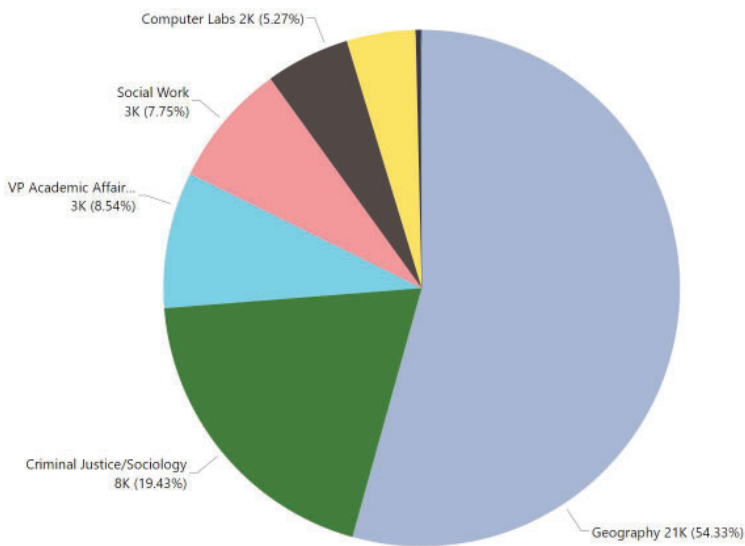

When constructed as the library, the second floor could hold a capacity of sixty thousand books in stacks kept closed to students. The third floor contained a reading room and current periodicals. Today Carmichael Hall is occupied by the School of Education and its dean's office.

LLOYD HALL

Courtesy of UA Department of Photography

Named after Stewart J. Lloyd (1881-1959), who served the University for more than four decades, first as Head of the Department of Chemistry (1911-1929) and then as Dean of the School of Chemistry, Metallurgy, and Ceramics (1929-1952).

Constructed on the east side of the Quadrangle in 1927, Lloyd Hall was built as other academic buildings of the time and built with a projecting central portico of Tuscan Doric columns. Over-scale stone quoins were used at the corners and made for a sharp contrast to the red brick used on the rest of the building.

In 1960, the building underwent a large addition to the rear.

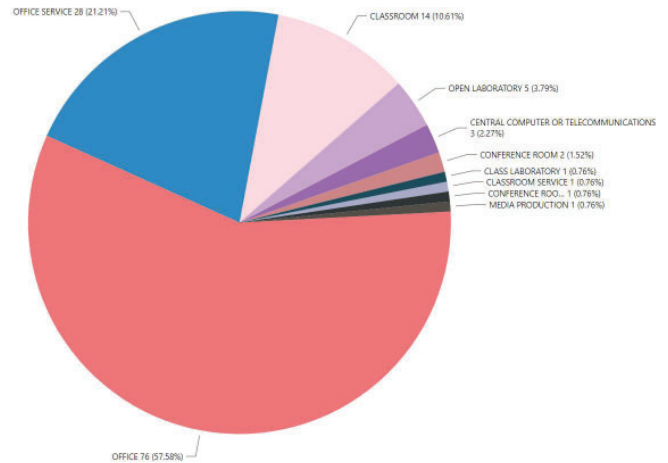

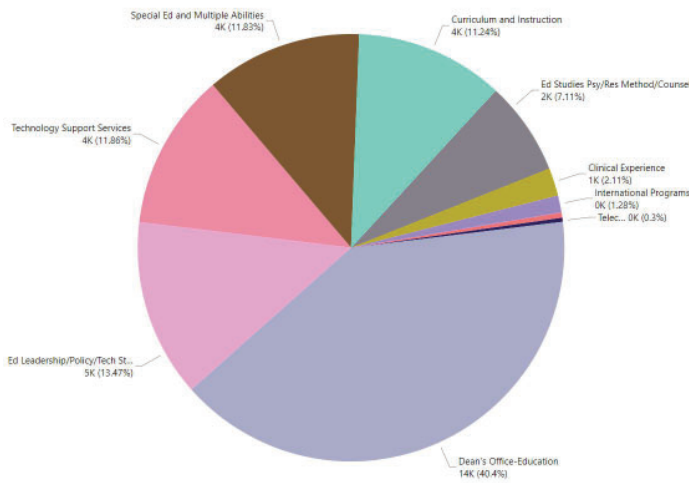

The Department of Chemistry moved out of the building and it was then converted into a general classroom building for the university that also contained food services space.

Built in 1929, formally known as Bibb Graves Hall, was built to house the College of Education. The main entrance was designed to face the southwest corner of the Quadrangle and facing the intersection of University Boulevard and Colonial Drive. The main entrance is at ground level and through a massive portico of Ionic columns. A stone attic with a Roman arch sits above the entablature and cornice,

In 2006, the building underwent a major renovation and continues to house the College of Education.

On February 3, 2022, the University of Alabama Board of Trustees voted to amend the name of the building to Lucy-Graves Hall, to honor the University's first Black student, Dr. Autherine Lucy Foster, alongside its longtime namesake. On February 11, 2022, they voted unanimously to rename the building simply Autherine Lucy Hall, reflecting concerns about Dr. Foster having to share the honor, especially with a figure who, though a progressive politician, was also at one point in the Ku Klux Klan.

Bidgood Hall, built in 1929, is the oldest of four buildings occupied by the Culverhouse College of Commerce and Business Administration. The building was named for the colleges first dean, Lee Bidgood.

The red brick building is adorned with a projecting Classical Revival portico of Roman Ionic columns, but unlike other buildings designed by the same architect, the columns do not sit atop a stone base and begins at ground level and spans the entire three-story height of the building. Along the building at the first floor level, rectangular windows span across the building with blind arcade.

The building's double exterior stair is covered by the portico and leads to a second story landing flanked by Adamesque oval windows.

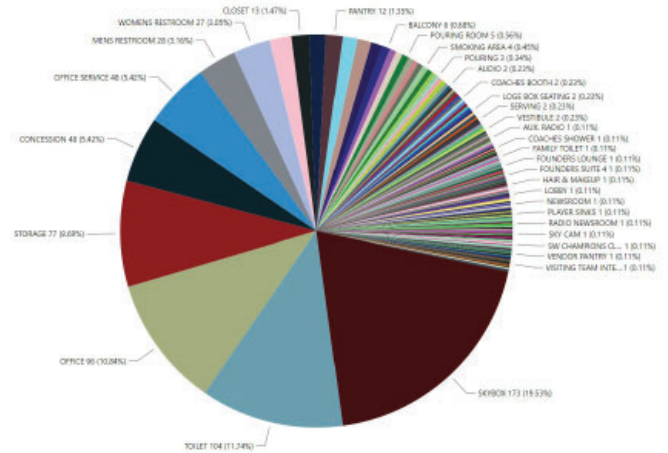

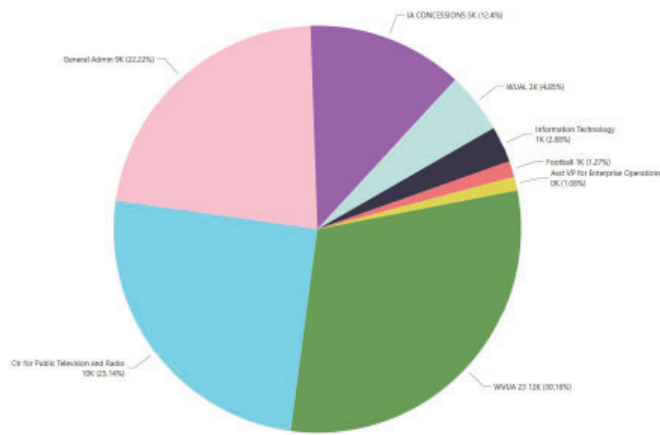

Today the building continues to house Culverhouse College of Business.

The stadium design began with an oval plan. Due to limited funds, originally the first section consisting of 12,072 seats on the west side of the field was completed in 1929 and named in honor of President George Denny. Bleacher seats were used on the opposite side and the end zones until 1936 when additional funds were provided and 6,000 additional seats were added to the east side. By 1960, the seating capacity had been enlarged to 30,000 and by 1966 the bowl design was completed. The original design of having an oval bowl was changed by flattening the ends of the oval to bring the end-zone seating closer to the field. Throughout the years the stadium capacity has grown to the extent of being one of the largest stadiums in the country.

In 1975, the stadium was renamed Bryant-Denny Stadium for head football coach Paul W. "Bear" Bryant for his coaching success and achievements.

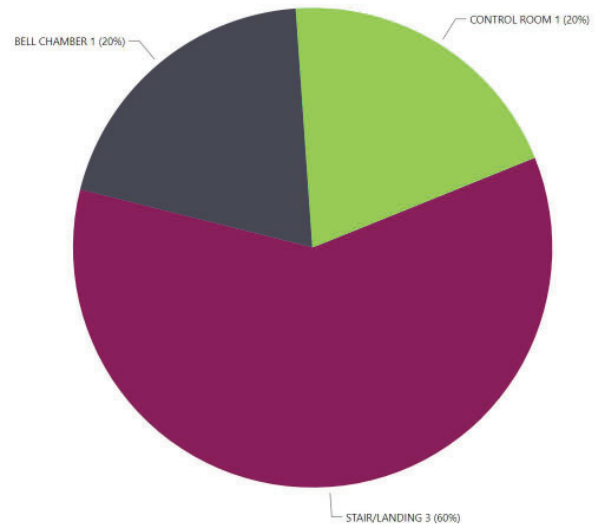

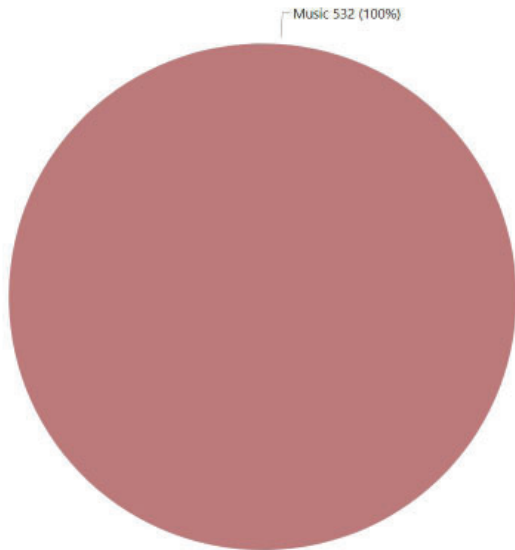

The North side of the stadium contains a plaza referred to as the "Walk of Champions" where players and coaches walk into the stadium on game days.

Denny Chimes bell tower was constructed in 1929, built as an enduring symbol of Alabama's first university, was erected in honor of President George H. Denny, under whose leadership (1911 to 1936) The University of Alabama gained national prominence. Conceived by Jerome M. Britchey and his classmates, this free-standing campanile carillon was built by Skinner, Maxwell, and Company and dedicated May 27, 1929, with Governor Bibb Graves presiding. Converted in 1945 from a bell carillon to an electronic system and modernized in 1966, its echoes have continued to touch the hearts and memories of Alabamians from every walk of life.

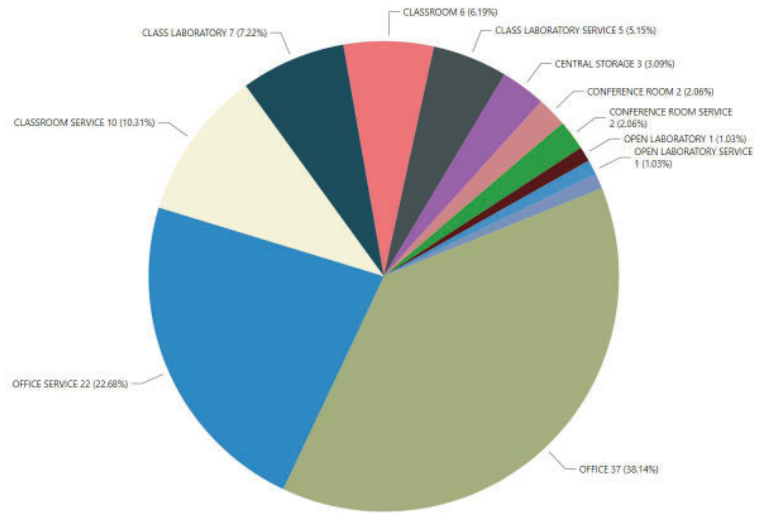

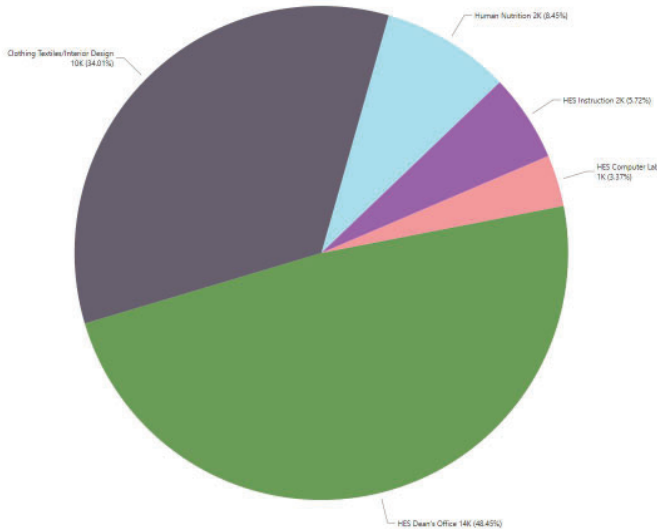

Exhausted by years of service, the system was replaced in 1986 with a 25-bell bronze carillon of the highest known quality and design. The funding for the bells and the establishment of a permanent fund for continuing maintenance were made possible by the University's alumni and special friends. This marker stands as a tangible expression of gratitude to all who have participated in the erection and preservation of this historical monument.

Doster Hall was built in 1930 and named for James J. Doster (1873-1942), Dean, College of Education (1911-1942).

Originally designed to house Home Economics, Art, and Music, this building was part of the "Women's Campus" developed on the University's southwest side during the early decades of the twentieth century.

The building housed classrooms, studios, and meeting rooms for various conferences and women's organizations.

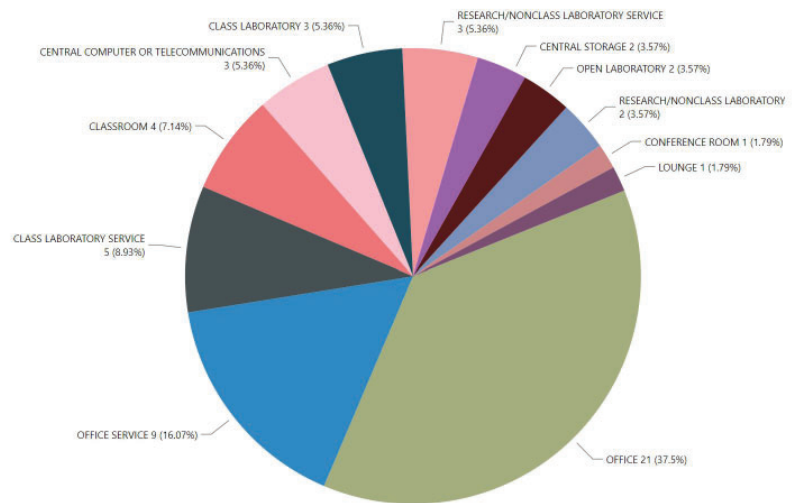

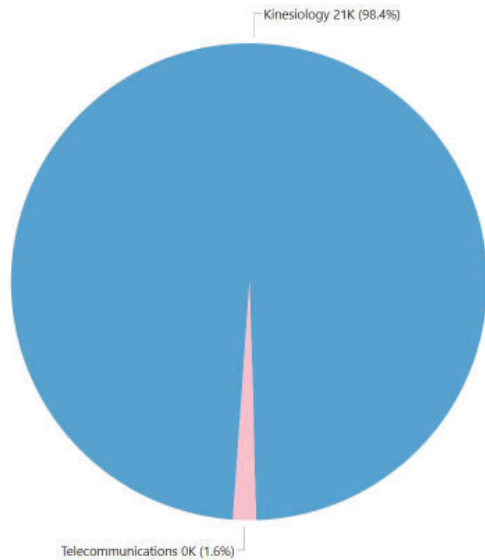

Today the building houses the College of Human Environmental Sciences.

The Bureau of Mines Building 1 was constructed in 1936. The building was originally built as a regional experiment station by the UA Bureau of Mines, which would serve the entire southeast. It was constructed in a Classical Revival style featuring a portico with “Tower of the Winds” columns.

During WWII, the building was the site of projects aiming to aid in improving the processing of materials that were essential for war efforts.

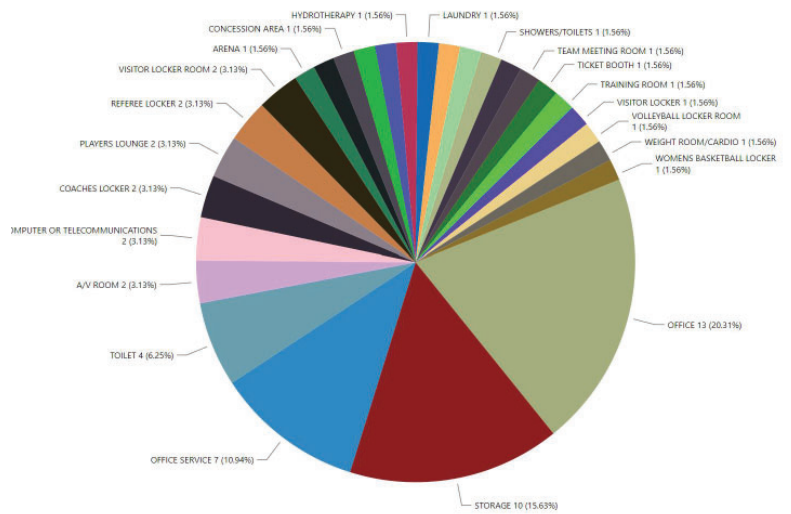

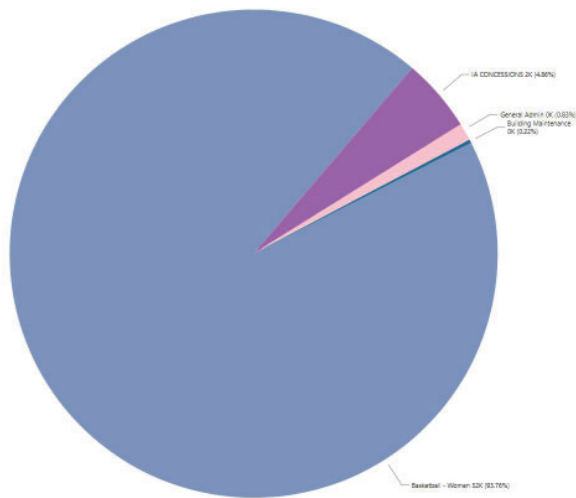

In 1994, the US Bureau of Mines downsized and determined to close the university’s location trans-ferring ownership back to campus.

Gorgas Library was constructed in 1939 and known as the Amelia Gayle Gorgas Library. It was named for Amelia Gayle Gorgas, wife of the school's president, General Josiah Gorgas. For years, Mrs. Gorgas served as the University's librarian until 1907 when she retired.

The library was erected just north of the site of the original Rotunda and the great staircase sat atop the northern half of the foundations.

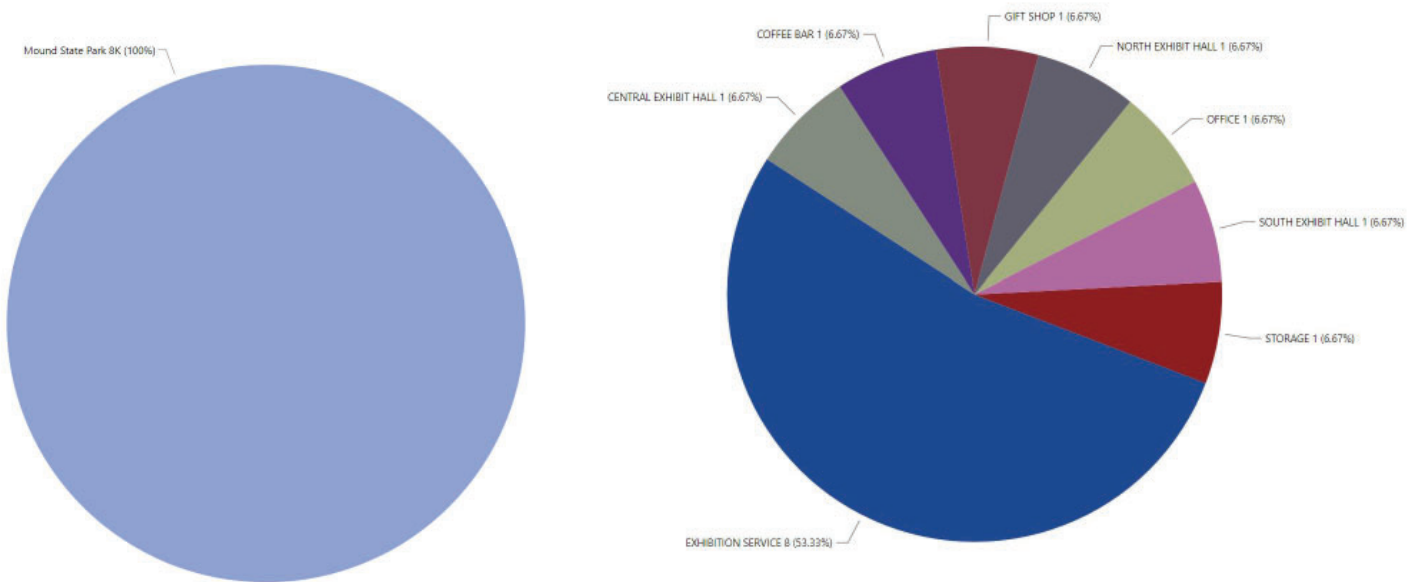

The largest building on campus in 1939, it sits on the northern center of the Quadrangle. It's Ionic colonnade corresponds to the style and scale of the President's mansion directly to the south of the library.

GALLALEE HALL

Courtesy of UA Department of Photography

Gallalee Hall was constructed in 1949 and was named for President John M. Gallalee. It was designed with a more modern utilitarian building with minimum classical details. The building contains a large observatory dome on the roof that is 20-ft in diameter and copper-over-steel that is rotated by a friction cable and electric motor. The dome houses a 10-inch refracting telescope supported on a 2-ton mount.
